Who is affected?

After a busy day, on the way home it happens... an uncomfortable sensation in the legs... the feeling of heavy legs!

Hot temperatures combined with air conditioning or wearing high heeled shoes or sports or simply sitting or standing all the day long...are the kind of situations that trigger uncomfortable sensations in legs: feeling of heavy, swollen, tired legs,...which can become painful.

Women are mainly affected but men also. No one is spared!

All women can be affected.

Behind Cedraflon, The Cedrat's legend, a new secret...

In France, the island of Corsica or "island of beauty", hides some natural secrets for women. The Cedrat... a rare and forgotten fruit (ancestor of lemon) was used first as a fragrance ... and now Cedraflon is made from this fruit, for its powerful re-energizing properties.

"It is said that one day, a young lady hurried by her first romantic date, completely dropped her Cedrat fragrance on her legs. She was first annoyed, but immediately captured by a feeling of relaxation. All the unpleasant sensation she knew after her day of work disappeared. In return she gained an incredible sensation of freedom in her legs. Added to the delicate fragrance given by the Cedrat, her legs were irresistible and her lover charmed forever..."

This secret is shared from generation to generation.
And now with Cedraflon, all women will have a new secret for their legs!
